

IFRS KMA

KNOWLEDGE MANAGEMENT APPLICATION

The Knowledge Management Application (KMA) v4.0

1. BACKGROUND

IFRS is the global language in financial reporting. With the adoption in almost all countries, the need for IFRS knowledge is vitally important for any professional reporting under this framework. In response to this, W.Consulting launched the IFRS Knowledge Management Application in 2009. We keep the IFRS KMA up to date from an information perspective and are constantly changing the users experience to be in line with latest technology enhancements that are available.

Why would this be of interest to you?

The application provides an opportunity for you to provide an invaluable resource to your organisation with not only a valuable IFRS resource centre, but access to just-in-time learning for every person in your team for one cost effective investment. In addition, the program gives professional staff access to CPD hours at no additional cost.

2. ENHANCEMENTS FOR 2016

This is a desktop application designed to deliver the latest developments in International Financial Reporting Standards. The application delivers on this in the following ways:

- Latest IFRS **News** page
- FRS Quickies **Videos** on the latest developments
- Fundamentals IFRS **E-learning** Modules (currently 44 available)
- Monthly update **webinars**, including a library of past webinars for future reference
- **Microsoft Office Learning**: Over 30 videos to increase user's knowledge of Microsoft Office.

In addition, members are able get **VERIFIABLE CPD** from the e-learning and webinars by completing a short quiz at the end of each module.

One of the **key enhancements** for 2016 is the inclusion of the IFRS standards in the application. W.consulting has licensed the standards from the IASB, and will provide a searchable database of the core IFRS standards for all users. This will work offline allowing access to these when users are not connected. In addition, it will give instant access to the standards where this is required.

The system will also cater for updates which will be done incrementally as the IASB publishes new standards.

The system will allow users to:

- Search the entire set of standards for a word or term
- Search specific standards for a word or term
- Perform wildcard searches
- Copy or print sections from the standards

The new standard system will be incorporated in the 2016 release.

3. WHAT YOU WILL SEE WHEN LAUNCHING THE IFRS KMA

Home Screen:

When each of the links above are clicked, they will expand revealing the items

4. INSTALLING THE APPLICATION

The application is available via a download link. Note that the program does not require any additional software or costly add-ons. It is compatible with all supported Windows operating systems. We also provide an IT support line for members who may need assistance. To date, we have helped a number of firms in installing the KMA across their networks to make it as easy as possible for them.

Once downloaded, users can locate the IFRS KMA by an icon that is automatically created on the users desktops.

5. FURTHER ENHANCEMENTS

The application is constantly being enhanced with new materials, as well as updates to the e-learning and webinars as IFRS continues to change. NOTE that all these enhancements are done at our cost, with the benefits passed onto users.
